## CIS 216 CarRentals Project 4

- Modify Project 3 Car Rentals to implement the Edit/Vehicle menu item.
- Use the ADO.NET Entity Framework CarsLibrary from Project 3
- Use the Master/Detail technique illustrated in the BooksExample
- Display the Car Sizes in a combo box
- When the user selects a car size, display the associated Price and Mileage Rate fields from the textboxes.
- The related Models and Manufacturer should display in a grid.

Add code to VehiclesForm_Load event to create instance of data tier and bind objects
