CarRentals Project 3

** Modify to use EF

Example Code: CS03 HandsOn Example.zip

- Modify Project 2 Car Rentals to implment the Edit/Customers menu item.
- Create a ADO.NET Entity Framework Library called CarsLibrary and connect to the cars.mdf database file.
- Add a DataSource to CarsLibrary
- Display the customer names in a combo box sorted in alphabetical order on the Customer form.
- When the user selects a name, display the associated fields from the Customer table in the textboxes.
    - Set ReadOnly to true
- Use a DateTimePicker for the date field.
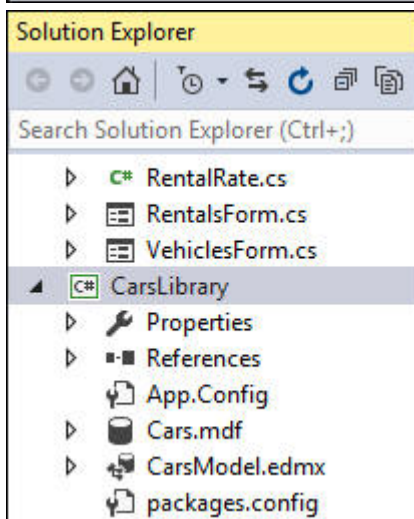

Add code to CustomersForm_Load event to load data
